NDCC UPDATE Sitrep No. 22 re Mayon Volcano

Releasing Officer:

GLENN J RABONZA
Administrator, OCD and
Chairman, NDCC

D A T E: 03 January 2010, 7:00 AM

Sources: DOST-PHIVOLCS, DSWD, DOH, DepEd, OCDRC-V, ALBAY PDCC, AFP, JTF MAYON, DPWH V

I. SITUATION OVERVIEW

- ❖ **DOST-PHIVOLCS is lowering the alert level of Mayon Volcano from Alert Level 4 to Alert Level 3 to reflect the overall gradual decrease of activity. Alert level 3 means that there is less probability of a hazardous explosive eruption**
- ❖ **However, the lowering of the alert should not be interpreted that the unrest of the volcano has ceased. If there is resurgence in the volcano's activity and the potential for explosive eruptions is perceived to be forthcoming, the alert level may be raised back to 4 but if there is noticeable downward trend in the monitored parameters, then the alert will be further lowered to Alert Level 2**

Observations from December 28, 2009 to present

- ❖ **A declining trend in Mayon Volcano's activity was noted as reflected in the following observations:**
 - **No ash ejection was observed since 29 December 2009. Steam emission was most of the time weak and white in color indicating considerable decrease in energy and absence of ash**
 - **Majority of the type of earthquakes that were recorded during the past days were associated with rockfalls and rolling down of fragments from the lava deposits along Bonga gully and the advancing lava front**
 - **Measured SO₂ levels have also showed a decreasing trend from a maximum of 8,993 tons per day to 2,621 tons per day. The still high concentration of SO₂ gas emission only suggests that there is residual magma degassing at shallow depth**
- ❖ **At Alert Level 3, sudden explosions may occur due to localized pockets of gas within the magmatic system, the effects of which are expected to be contained within 6-km radius Permanent Danger Zone (PDZ) around the volcano and within the 7-km radius EDZ in the southwest quadrant**

Recommendations:

- ❖ **PHIVOLCS-DOST recommends that the 6-km radius PDZ around the volcano and the 7-km EDZ on the southeast flank of the volcano should be free from human activity because of sudden explosions that may generate hazardous volcanic flows**

- ❖ **People residing close to these danger areas are also advised to observed precautions associated post eruption activity such as: rockfalls, pyroclastic flows, and ash fallout which can also occur anytime due to instabilities of lava deposited on steep slopes**
- ❖ **Active river channels and those perennially identified as lahar prone in the southern sector should also be avoided especially during bad weather conditions or when there is heavy and prolonged rainfall**
- ❖ **Civil aviation authorities must advised pilots to avoid flying close to the volcano's summit as ejected ash and volcanic fragments from sudden explosions may pose hazards to aircrafts**

Mandatory Evacuation

- ❖ On December 14, PDCC Albay imposed the mandatory evacuation of population within the 6 km radius Permanent Danger Zone (PDZ) and the 6.8-km EDZ in the southern quadrant – particularly Buyuan, Mainit and Bonga areas
- ❖ **The DSWD reported that a total of 10,080 families / 47,766 persons coming from 32 barangays in five (5) municipalities and three (3) cities in Albay were affected**

Status of Evacuees as of January 2, 2009

- ❖ **As of January 02, 2009, twenty eight (28) evacuation centers are still open providing temporary shelter to the 9,470 families / 44,938 persons**
- ❖ Out of the above number 2,114 families / 8,765 persons are classified by the LGUs as Economically Disrupted Households (EDH) which means that though their houses are not located within the danger area, the means of livelihood are within the danger area
- ❖ Of the families classified as EDH, 1,471 families / 5,469 are staying inside five (5) resettlement sites namely: **Anislag Resettlement Site; J. Estevez Village; Anislag RS Ph3 ; Daraga R/S 1; and FVR –FNM R/S**, while 643 families / 3,296 have not yet been relocated
- ❖ **Decampment in some evacuation centers is on-going in view of the lowering of Alert Level 4 to Alert Level 3**
- ❖ PDCC Albay reported four (4) cases of conjunctivitis or sore eyes in Tabaco City

Extent of Humanitarian Aid/Assistance as of January 02, 2009

- ❖ The over-all cost of assistance provided by the Government and NGOs/Other GOs is **PhP61,288,654.76 – (Tab A)**

Assessment of WASH Concerns and Recommendations:

- ❖ Water Supply – **(50% 914/28)** of evacuation camps have adequate water supply, Majority source is water faucet supply. Assessment of water source is ongoing in newly opened centers
- ❖ Latrines - Toilets are inadequate in evacuation camps with a present ratio of **1:45 to 1:28 per latrine (WHO standard is 20/ latrine)**. School toilets and lavatories are being used by evacuees – recommended the use of portalets and construction of new toilets. CHD V will provide toilets
- ❖ Garbage Disposal - **86% (24/28)** have adequate garbage disposal through collection with observance of waste segregation – there should be regular garbage collection
- ❖ Shelter - **the population to shelter ratio ranges from 1:159 to 1:2 per room. Recommended continuous monitoring of present number of families per room in every evacuation centers**
- ❖ Health Status – Sixty six (66) (16/24) health clinics in the different evacuation camps and manned by CHO Staff during day time and BHW at night time – recommended isolation and treatment of conjunctivitis patients

Health Services Provided

- ❖ Immunization - to be instituted once the evacuees are settled
- ❖ Nutrition - to conduct mid-upper arm circumference (MUAC)
- ❖ Consultation - 282 patients were attended with cough, colds, ARI, HPN, fever and asthma as the leading causes
- ❖ Health Education - on-going in some evacuation centers

4. Psychosocial Cluster

- ❖ **Chief BRTTH** presided over the Psycho-Social Cluster Meeting which was held on 28 Dec and attended by DOH-CHD, OCDRC5, DSWD5, PNRC, TESDA, DA, PO, AHEM, 901bde, Albay PPO, PHILHEALTH, Bicol University, Save the Children and COPE College to determine line of activities in response to the psycho-social services in the evacuation centers. Concerned agencies to submit proposed activities to respective coordinators by Jan. 2, 2010.
- ❖ **DSWD FO-V** in coordination with the local government unit of Daraga, Albay conducted an entertainment activity called “DSWD Cares” on 22 Dec 2009 as part

of the psycho-social intervention being provided to the evacuees; organized three (3) psychosocial teams for debriefing and counseling of evacuees in coordination with DOH-RHU 5

- ❖ **SWD-FO 5 organized three (3) psychosocial teams for debriefing and counseling of evacuees in coordination with DOH-RHU 5**
- ❖ **DOH-CO started the conduct of psychosocial debriefing for affected and responders.**

5. Education Cluster

- ❖ Forty five (45) schools have been designated as evacuation centers: 21 in Albay, 11 in Legazpi City, 6 in Ligao City and 7 in Tabaco City
- ❖ Classes in all schools within the 8 km radius of Mayon were suspended and school authorities were advised to devise scheduling and shifting strategies that would enable pupils using these evacuation classrooms to revert to regular classes as soon as possible and for the evacuee pupils to hold classes within the premises of the evacuation school. This is to minimize disruption in classes particularly given that evacuation period for Mayon eruption will last between 42 to 87 days
- ❖ **Legaspi City Division, DepEd 5** issued an emergency measures for instruction/implementation applicable only to schools being used as evacuation centers.
 - Albay District, Albay Central School, Buyuan ES and Matanag ES – Pupil evacuees will hold emergency classes from 12:00 Noon to 6:00 PM. Classes will return to normal schedule once the PHIVOLCS announces for the return of evacuees to their own places. Pupil evacuees will attend classes AM and PM following the same schedule at the EC once classes go on, the rest of the room occupants will stay at the tent outside the rooms being used as classrooms
 - Bugtong Elementary School - Pupil evacuees will be integrated with the pupils in EC since the number of children is manageable with regular sched of classes
 - Legaspi Port District II Gogon CS (Bonga and Mabinit), San Roque ES (used by Mabinit ES) – Holding of emergency classes will be AM giving importance to the content subjects with 250 minutes/classes will start at 6:30 AM to 12:00 Noon. Occupants of the room will go out, to give way to those holding classes
- ❖ **DepEd Albay's next steps/plans when classes resume in January 2010:** will accommodate displaced children at Big Central Schools; double shift classes in Host schools; to tap displaced teachers from affected schools to assist the teachers; and alert identified roster of staff of NGO partners on-call for deployment
- ❖ **CHED conducted community exposure activities such as health care, administration of medicines, health assessment and health teachings among others**
- ❖ **CHED 5 RD issued the Regional Memorandum Circular last December 23, 2009**
